Transforming Frontline Operations Across Southeast Asia

Kelvin Lek

Founder & Managing Director
Comm360 Pte Ltd

comm360^o

INTRODUCTION

My journey began in **logistics**, followed by launching a **medical emergency startup** in 2010 that didn't succeed—but it taught me **resilience** and **purpose**. I pivoted into **rugged and explosion-proof devices** for **high-risk industries**, and by 2018, introduced **PTT360** and **WizyEMM** to support **safer, smarter field communication**. In 2019, I founded **Comm360** to help companies **transform frontline operations** with **AI-powered tools** like **WizyVision**—replacing paper, cutting inefficiencies, and enabling **real impact** across **Southeast Asia**.

HOBBIES AND INTERESTS

I'm passionate about lifelong learning and often explore AI, automation, business strategy, and motivation through platforms like TikTok and ChatGPT. Outside work, I enjoy quality time with my wife and our dog, caring for my aquarium fish, and staying active with daily walks and new ideas.

MY BURNING DESIRE

To continuously improve myself and help others grow—so together, we can make a meaningful difference in business and in life.

NOT MANY KNOW THIS

I may seem serious or reserved at first, but those who know me find I'm approachable, supportive, and easy to talk to. I value sincerity and honesty in all relationships, and I genuinely enjoy helping others grow—both personally and professionally.

MY KEY TO SUCCESS

I believe success comes from staying true to your values, even when it's hard. With clarity of purpose, courage to let go, and the discipline to grow, I've learned that resilience, integrity, and a genuine drive to help others are what create lasting impact.

PROFESSIONAL DETAILS

comm360™

Comm360 helps industrial teams transform the way they work on the ground. By replacing paper chaos with an AI-powered no-code app builder platform, push-to-talk communication, and rugged explosion-proof smart devices, we enable real-time, accurate digital workflows that boost safety, speed, and productivity across oil & gas, chemicals, logistics, and manufacturing.

We help companies keep their ERP systems updated with clean, reliable data—reducing errors, ensuring audit readiness, and staying compliant. From work orders to asset tracking and safety checks, Comm360 empowers frontline teams to work smarter, stay connected, and deliver results that matter.

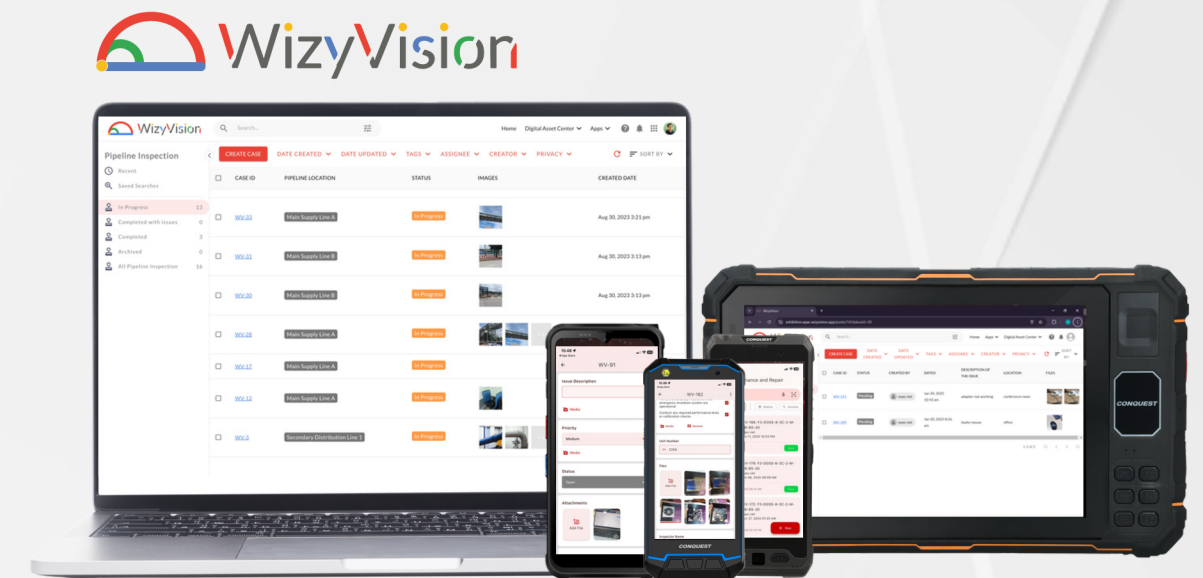

TOP PRODUCTS

At Comm360, we offer an integrated suite of platforms built to transform frontline operations across high-risk and field-intensive industries:

- **WizyVision** – AI no-code apps for inspections & digital forms
- **PTT360** – Push-to-talk for secure, real-time team coordination
- **WizyEMM** – Full device control & mobility management
- **Conquest ATEX** – Explosion-proof smartphones for hazardous zones
- **Rugged Devices** – Tough phones & tablets built for harsh environments
- **AGM & Emdoor** – Extreme-performance rugged smartphones

These platforms are built for companies serious about eliminating inefficiencies, enforcing compliance, and scaling operations—without compromise.

SKILL

comm360™

With 10+ years of experience, Comm360 helps industrial businesses digitize frontline operations to boost efficiency, safety, and scalability.

Our strengths:

- Automating manual workflows with AI no-code app builder
- Delivering complete solutions: PTT360, EMM, and ATEX devices
- Leading GTM, branding, and regional growth across SEA
- Providing enterprise-grade deployment and support

For companies ready to modernize, we deliver results—on the ground, where it matters most.

GOAL

At Comm360, our goal is to help industrial companies across Southeast Asia digitize frontline operations. We replace manual, paper-based workflows with AI-powered no-code app builders, push-to-talk application, rugged device management, and rugged explosion-proof smartphones.

Our focus is on improving safety, increasing productivity, and ensuring clean, audit-ready data that integrates seamlessly with ERP systems—empowering operations, engineering, IT, and safety teams to work smarter and stay compliant.

TOP PROBLEM SOLVED

I help industrial businesses eliminate paper, reduce delays, and take full control of their frontline operations.

Too many companies still rely on manual forms, scattered tools, and inefficient communication—leading to costly errors, delayed reporting, and poor visibility on the ground.

With AI-powered digital forms, push-to-talk communication, and enterprise mobility management, I streamline workflows, boost safety, and bring real-time clarity across job sites, factories, and field teams.

OUR CLIENTS

ACCOMPLISHMENT

Comm360 is a trusted digital transformation partner for industrial businesses across Southeast Asia.

Operating in eight countries, we deliver AI-powered, mobile-first solutions that have modernized operations for industrial teams across Southeast Asia.

Our ecosystem—WizyVision, PTT360, WizyEMM, and Conquest ATEX smartphones—has driven measurable gains in safety, efficiency, and visibility.

In 2024, Comm360 was named an SME100 Award Winner, recognizing our impact in scaling smart, compliant, and paperless operations across high-risk industries.

My Favorite BNI Story

I was a proud BNI member from 2021 to 2023. Back then, my goal was simple: build enough, retire early, and slow down. But being surrounded by growth-driven leaders changed that.

Conversations around scale and impact reignited something in me. After stepping back post-COVID due to travel and rebuilding, I kept feeling the absence of that energy only BNI brings.

On 1st June 2025, I rejoined—with greater clarity, a stronger vision, and the drive to grow alongside some of the region's most inspiring business leaders.

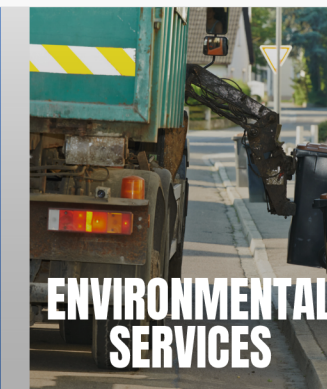

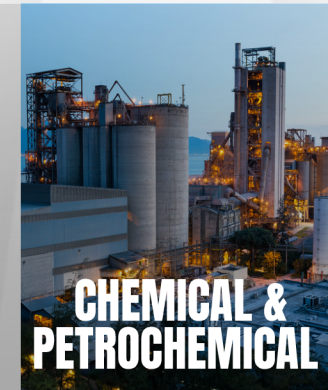

IDEAL REFERRALS INDUSTRIES

I'm looking for referrals to industrial companies still stuck with **paper forms**, outdated **walkie-talkies**, or **no control over their mobile devices** - pain points that lead to delays, errors, and compliance risks.

We help streamline operations, improve safety, and give teams real-time visibility through digital forms, push-to-talk, and mobile device management.

Ideal contacts include **Operations Directors, IT Managers, or Safety Leads** looking to modernize how their teams work. If you know someone, I'd appreciate the introduction.

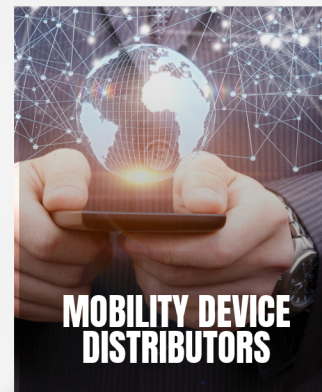

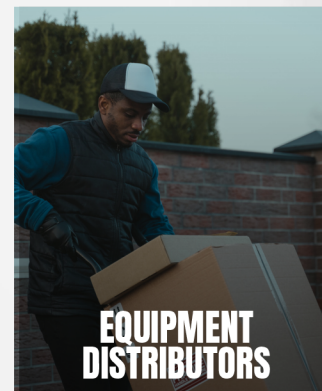

IDEAL REFERRALS PARTNERS

I'm looking to partner with professionals involved in **operations, safety, or digital transformation**—especially those supporting frontline-heavy industries.

Ideal partners include **ERP consultants, IT providers, safety vendors, or industrial system integrators** helping clients still reliant on **paper forms, outdated tools, or disconnected workflows**.

By working together, we can help clients modernize faster—through **AI-driven digital forms, push-to-talk communication, and secure mobile device management**—delivering real impact where it matters most.
